

Formal opening for the 1921 season of "Elmwood," the Saegeer Amusement Company's Recreation Home in this city, which will take place with appropriate ceremony and festivities, is the occasion where Bay St. Louis says again, Welcome, thrice Welcome to the Company and its many representatives who will summer here.

SUBSCRIPTION, \$2.00 PER ANNUM, ALWAYS IN ADVANCE.

The Spaulding Echo

BAY ST. LOUIS, MISSISSIPPI

SATURDAY, JUNE 4TH, 1921.

BANK STATEMENTS LOOM UP BIG.

Recent financial statements of the Bay St. Louis banks, as reported to the auditor, loom up big with total resources nearing the two million mark. This is an unflattering evidence and a telling factor in our growth and prosperity. Banks mirror the prosperity or failure of communities—no mistake about it!

THIRTIETH YEAR—NO. 23.

COMING! COMING! D. W. Griffith's "The Greatest Question."
Growers Holding Wool.

Wool growers of Harrison and Jackson, counties from which section large quantities of wool is gathered each year, have so far been unable to dispose of their wool this season because of the low price. There is between fifty and seventy-five thousand pounds of this fleecy staple, and one of the largest crops in several years, to be held for better market.

State Medical Examinations.
There will be an examination of applicants to practice medicine held at Jackson June 20, 21, 22 and 23. The first day will be a business session and the remaining period will be devoted to the examinations of applicants. Medical students who have completed two of the four-year course required are permitted by law to take examination in either the City of Bay St. Louis, Mississippi, shall issue bonds to the amount of \$98,000, or so much thereof as may be necessary with interest at the rate of six percent per annum, for the construction or erecting of water works in said city for public use.

Piggly Wiggly Opens Store at Biloxi.
Plans are being made for the opening of a Piggly Wiggly store in Biloxi of which J. C. King of Mobile will be the manager. This will be the first of its kind along the Mississippi coast.

NOTICE OF CITY BOND ISSUE

Whereas the Board of Mayor and Aldermen of the City of Bay St. Louis at a previous meeting decided that it was necessary for the public health and convenience and for fire protection, that the City own and operate its own water works system and;

Whereas, the Board of Mayor and Aldermen have employed an Engineer and tentative plans and estimates have been made, filed and approved and as the City has no funds available with which to construct its water works, therefore

Resolved, that the Board of Mayor and Aldermen of the City of Bay St. Louis that it is their intention and purpose to issue bonds of the City of Bay St. Louis, Miss., in the sum of Ninety Three Thousand, (\$93,000) Dollars, or so much thereof as may be necessary at a rate of six percent per annum for erecting or constructing and maintaining a water works system in said City for the use of the people of said city at a certain rental or charge to be fixed for all persons who may be connected with the Board of Mayor and Aldermen.

Be it Further Resolved; that this resolution be published and election held in accordance with Chapter 206 of the laws of Mississippi of 1920 and Section 2314 of the annotated code of 1906 of the State of Mississippi (section 5968 of the Hemmingway Code) and such other sections of the annotated code of 1906 of the State of Mississippi and such amendments thereto including said Chapter 206 of the laws of 1920, as may be necessary and the provisions of the special charter of said City for the purpose of notifying the people of the City of Bay St. Louis, Miss., of the proposed action of the Board of Mayor and Aldermen of said city and of the election to decide the issue of the said bonds. That as the City of Bay St. Louis has less than twelve thousand inhabitants and the amount of bonds proposed and intended to be issued is more than thirty thousand dollars and that Chapter 206 of the laws of 1920 make it compulsory to hold an election to have the approval of the voters to issue said bonds;

It is further resolved that an election be held on Saturday, July 9th, 1921 within legal hours to vote on the question of whether or not the said bonds in the sum of \$93,000.00 or so much thereof as may be necessary with interest at the rate of six percent per annum, be issued for the purpose of erecting and constructing and maintaining water works.

Be it further resolved that the following named persons be and is hereby appointed as commissioners to hold said election, to-wit: W. H. McDaniel, Miguel Parillo and W. C. Rensford, and that said commissioners have printed the necessary tickets or ballots for said election and that said tickets or ballots shall contain and embody the intentions of the Board of Mayor and Aldermen to issue said bonds for said purpose and all other things required by law and on the bottom of said tickets or ballots shall be the following:

FOR BOND ISSUE.

AGAINST BOND ISSUE.
Notice is therefore given that a special election will be held at the City Hall, on Saturday, the 9th day of July, 1921, during the legal hours, to determine whether the City of Bay St. Louis, Mississippi, shall issue bonds to the amount of \$98,000, or so much thereof as may be necessary with interest at the rate of six percent per annum, for the construction or erecting of water works in said city for public use.

ATTEST: R. W. WEBB, Mayor.
SYLVAN J. LADNER, Secretary.

Just received a fresh line of Eastman Kodaks and new films at Bay Jewelry Store.

OBSTRUCTION IN CANAL NEAR LONG BEACH REMOVED.

Great Drainage Project in Harrison County Now Free to Carry Off Water. Will drain 11,000 Acres. Cost, \$45,000.

GULFPORT, June 1.—The low reverberations heard in Gulfport today was not thunder or the roar of artillery but the finishing touches being put on the drainage canal back of Long Beach through the agency of dynamite.

For about 2000 feet a small ditch had been dug on the drainage canal in which was placed a ton or so of dynamite. At the invitation of W. H. Bouslog, one of the county's most active men, a few Gulfport citizens were present to watch the operation. There were two blasts, one quickly following the other. The results of which almost defy description. Water mud and roots were thrown almost 100 feet in the air and they together with the smoke from the dynamite was not unlike the eruptions of a volcano.

The dynamite was used to clear an obstruction in the canal which impeded the free flow of water. It was estimated by Mr. Bouslog that the work done with the dynamite at a cost of about \$800 would have cost \$3000 if it had been necessary to bring the dredge back to do it with the work done to date the canal is now ready to perform the fullest of service for which it was constructed.

The canal, in some respects, is the greatest undertaking assayed by any section of Harrison county. Its cost is approximately \$45,000 and is built by bond issue. The canal is 11 miles long, twenty feet wide and six feet deep, and it drains 11,000 acres of land.

A Gulfport photographer made a number of views which will be used in connection with the descriptive matter of the canal.

DELIGHTFUL AFFAIR.

An affair of unusual interest and pleasure was the bridge party given Saturday afternoon at the Tea Garden by Mrs. E. J. Lacoste, who was assisted in receiving by her sister-in-law, Miss Evelyn Lacoste. The party was one of the larger occasions given recently and its large attendance and the success of the evening marked it as one of prominence.

Mrs. Lacoste's radiant personality and lavish hospitality were elements of the afternoon that in no small measure contributed to the pleasure of those present.

Quite a number of games were played during the afternoon, one more fascinating than the other, compelling interest, as the friends of the game. At its conclusion the handsome trophies were awarded Mrs. C. G. Moreau and Miss Hilda Spori as the successful contestants.

Among the guests present were: Mrs. Bell, Mrs. Carl Marshall, Mrs. E. J. Leonard, Mrs. R. M. Stevens, Mrs. Geo. C. Firsching, Mrs. C. G. Moreau, Mrs. R. W. Taylor, Mrs. C. L. Walker, Mrs. M. Briggs, Mrs. Donald Marshall, Mrs. Linn Banks Anderson, Mrs. R. W. Sistrunk, Mrs. George E. Roe, Mrs. Leo W. Seal, Mrs. A. P. Smith, Mrs. J. Penada, Mrs. J. A. Evans, Mrs. Owen Crawford, Mrs. J. W. Harrison, Mrs. R. de Montluzin, Mrs. J. Borden, Mrs. P. Jenks, Misses Hilda and Elsie Spori, Isabel Desjone, Louise Crawford, Decima Red, Evelyn Lacoste.

No Mobile Excursions to Coast.

Mayor Kennedy of Biloxi has been in conference with Superintendent John Bose of the L. & N. Railroad relative to placing of Sunday excursions over the company's line from Mobile to Bay St. Louis. The official stated owing to shortage of equipment the matter would be held in abeyance until a later date.

GRADUATION AT LOGTOWN

Logtown High School Held Exercises of the Kind in its History.

The Logtown High School last Friday, May 27th, 8 p. m., auditorium was crowded to its capacity—not even standing room remaining.

The Senior Class led by Arendale and the trustees of the school, marched into the hall body and took their respective places on the stage. The four young men composing this class were: Robert "Red" graduates" being dressed in cool, crisp, white organdy carried bouquets of pink carnations and maiden hair fern. The stage artistically draped in the class, gold and silver—caught heaven's light with bunches of carnations, the class flower, while the rest of the whole was enhanced by large bouquets of maiden hair fern.

The exercises were opened with a vocation by Rev. H. L. Norton, in which the following program was rendered with great ability and interest, most pleasing to the audience:

Salutatory—Miss Alma Parker.
Prophecy—Miss Florence Russ.
Last Will and Testament—Miss Diana Evans.

History—Miss Nettie Holleman.
Harrell Address—Miss Diana Evans.
The talented Miss Alice Fountain played several piano solos, which added much to the enjoyment of the evening.

Carl Marshall, of Bay St. Louis, addressed the graduates, and as is usual with Mr. Marshall, the attention of the large audience was held from the first word spoken until the last.

Exercises closed with the awarding of diplomas by Prof. V. A. Arendale and benediction by Rev. H. L. Norton.

This was the first graduation ever held in Logtown, hence it created much interest. It faculty this year consisted of Prof. V. A. Arendale, Misses Gertrude Weston, Helen Fountain and Mabel Smith, who deserve much credit for the close of a most successful school term.

What a Strange Thing of a Hotel Project for Mississippi Gulf Coast.
(New Orleans States.)

J. K. Leaming, of Seattle, Wash., well-known hotel owner and operator, has been in the Pacific coast, is among the guests at the St. Charles, coming here to investigate several propositions for establishing new hotels on the Mississippi Gulf Coast.

Leaming is the sole owner of the Leaming Hotel at Seattle, Wash., and is looking over the country for a new location. He has been engaged in the hotel business virtually all his life since a young man and in the last three years has devoted most of his time to the hotel business.

Leaming is a national law governing marriage is not probable since such legislation would interfere with state rights.

That a daily newspaper in one of our great cities cannot prosper and continue publication without disseminating news of society scandal, murders, etc., has been proven by the failure of a paper in Chicago pledged to omit such news from its columns. This paper was launched under the auspices of the "Pious" and in its notice of discontinuance in its closing edition the editor states that lack of support was the cause of its failure.

The nauseating news published in some of the larger dailies is indeed somewhat of a reflection on the decent sensibilities of our people for sordid happenings. The Hamon murder trial in Oklahoma and the case of Stokes in New York, are notable among the recent items of this class. We do not believe, however, with some of the extremists, that this craving for the worst type of news is indicative of a degenerating race. The greater majority of Americans are safe and sane and will survive our present saturnalia of a newspaper scandal. We had some satisfaction in the fact that virtue is not yet so rare that it must be featured in double columns on the front page. As long as virtuous items are so in the majority that they must be considered so common as to merit no mention or when mentioned in the accented smaller space of the inside pages, the country is safe.

"Big Bill" Haywood, one of the leaders of the Industrial Workers of the World and under indictment in this country for obstructing the draft law and otherwise hindering the government's war activities, has forfeited a \$50,000 bond and escaped to Soviet Russia from whence it is said he will be the directing genius of a Bolshevik propaganda in the United States.

That there is already vicious propaganda at work in this country to further the aims of the Communists for world domination cannot be denied. Good Americans everywhere must be on the watchout for this class of literature and do all they can to suppress it. In industrial centers it thrives most. Agitators work among the unemployed, in disconcerted and in many cases find willing converts to their alluring promises of something for nothing.

PRESS AND COMMENT

It is about one-third of the energy that is being expended to evade the Volstead act was put into the business of forming a league to prevent grafting was and settle the business world would soon have a civilization safe for democracy and a better country to live in.

We are all more or less familiar with the efforts of various ones to concoct home brews and distill by means of a kick in it but a Burlington, Colorado, man has an entirely new idea.

This man claims to have developed a yeast which he inserts into half grown watermelon by means of plunging it after which the seeds of the watermelon are removed and tape and less nature begin work. The yeast acts on the natural sugar of the melon and develops alcohol in the tissues. Thus an edible growth with the much desired "kick" is produced.

What a forecast an enormous movement of watermelons from Colorado this summer.

The recent divorce in Nevada of Mary Pierce from her husband, Owen Moore, also an actor of note, and her immediate re-marriage to Douglas Fairbanks, likewise a national favorite in the movies, has caused agitation in that state for an amendment to its somewhat lax divorce laws.

At present, six months' residence within the state is sufficient to obtain a divorce under their laws. No interlocutory decree is issued. The final decree is granted. This has made the state a mecca for married couples from all over the United States. Reno, the Capital city, has become a standing vaudeville joke.

In the matter of divorces the United States leads all the Christian nations. Our record is only exceeded by one other nation, Japan. Of the forty-eight states in the union only one has no divorce law. The state of South Carolina grants no divorces. Of the great cities of the United States, Los Angeles has more divorces in proportion to population than any other. New Orleans has fewer.

In our opinion, the legislators of Nevada, and for that matter, any other state, are on the wrong trail when they seek to cure the divorce problem by making divorce more difficult. We need uniform marriage laws in the United States that will make marriage more difficult. The business of getting married is now too easy. The impulsive marriage must be curtailed by the divorce law. A national law governing marriage is not probable since such legislation would interfere with state rights.

That a daily newspaper in one of our great cities cannot prosper and continue publication without disseminating news of society scandal, murders, etc., has been proven by the failure of a paper in Chicago pledged to omit such news from its columns. This paper was launched under the auspices of the "Pious" and in its notice of discontinuance in its closing edition the editor states that lack of support was the cause of its failure.

The nauseating news published in some of the larger dailies is indeed somewhat of a reflection on the decent sensibilities of our people for sordid happenings. The Hamon murder trial in Oklahoma and the case of Stokes in New York, are notable among the recent items of this class. We do not believe, however, with some of the extremists, that this craving for the worst type of news is indicative of a degenerating race. The greater majority of Americans are safe and sane and will survive our present saturnalia of a newspaper scandal. We had some satisfaction in the fact that virtue is not yet so rare that it must be featured in double columns on the front page. As long as virtuous items are so in the majority that they must be considered so common as to merit no mention or when mentioned in the accented smaller space of the inside pages, the country is safe.

"Big Bill" Haywood, one of the leaders of the Industrial Workers of the World and under indictment in this country for obstructing the draft law and otherwise hindering the government's war activities, has forfeited a \$50,000 bond and escaped to Soviet Russia from whence it is said he will be the directing genius of a Bolshevik propaganda in the United States.

That there is already vicious propaganda at work in this country to further the aims of the Communists for world domination cannot be denied. Good Americans everywhere must be on the watchout for this class of literature and do all they can to suppress it. In industrial centers it thrives most. Agitators work among the unemployed, in disconcerted and in many cases find willing converts to their alluring promises of something for nothing.

In order to fight the soviet with their own methods, campaigns are being organized under the heading of "Better America League" whereby literature, combatting the false promises and doctrines is being distributed and speakers are being sent out to "soap box" for America.

Propaganda in this country is not confined to what is known as the Bolshevik. We have the pro-German, the anti-Japanese, the anti-Jewish, and others too numerous to mention. It is no time for Good Americans to be looking around for new doctrines. Keep a level head and don't back the boat. We have great internal problems to settle and we must not be weakened by outside influences. The only propaganda we should encourage is one for a better America and the only "pro" we must support is an American.

JESSE DUNN SHOT AND KILLED FROM AMBUSH MONDAY.

Was Under Indictment for Murder of Luther Mitchell. His Death Predicted When Allowed Liberty on Bond.

Jesse Dunn was shot and killed near Pacyune Monday by parties unknown. Dunn was indicted by the grand jury at the April term court on a charge of murdering Luther Mitchell and was released on bond. It was freely predicted in the Dunn Mitchell neighborhood that if Dunn returned to that section he would never be lived to be tried.

According to the best information obtainable at Pacyune, Dunn, accompanied by two of his wife's nephews, who were driving a car, was hit in the head with buck shot and all fled from the car except Mr. Dunn, who returned the fire, and when the other occupants returned to the car they found Dunn 200 hundred yards from the car with his head almost severed from his body by buck shot.

Dunn was a farmer and had large family. There had been trouble between him and the Mitchell family for some time before the killing of Luther Mitchell.

PREACHER HAD FIERY PRAYER.

Devout Colored Brother Wanted His Fill of Grace.

RED ROCK, Miss., June 3.—The Lord has listened to all manner of exhortations throughout the ages, from the chant of the savage tribes of the jungle to the polished recital of the Broadway pastor, but the oddest supplication, probably was that of an old colored minister of Red Rock. A white man who heard the devout colored divine, and who happened to be a short hand expert, took it down verbatim. It shows that the dash-dipped apostle is as successful as he is devout for he included in his exhortation all the modern contrivances of the twentieth century—and probably some which have not yet been invented. The prayer follows:

"O Lord, give Thy servant this mawmin' the eyes of the eagle and the wisdom of the owl, connect His soul with the gospel telephone in the central skies, illuminate His brow with the sun of heaven, pierce his mind with the love for the people, grease his lips with 'possum oil, loosen his tongue with the sledge hammer of Thy power, 'lectify his brain with the lightning of the Word, put 'getual motion in his 'ahms, fill him plumb full of the dynamite of Thy glory, 'noint him all over with the kerosene oil of Thy salvation and set him on fire. Amen."

Those sections where the world's great staples are grown these lands look very unattractive, but intelligent cultivation of them shows how erroneous such ideas are. A local real estate firm has incorporated in a circular just published just what has been accomplished in this section by farmers who are energetic and who have good judgment. E. Hagan, who cultivates 100 acres near Wolf river makes a statement certified to before Judge A. Ballance that he made 7,000 gallons of syrup off 20 acres of land, and that his other products consisting of cotton, corn, beans and potatoes, (Irish and sweet) had a market value of \$15,000. S. A. Chandler states that from 7 acres planted in vegetables during the past winter and spring were \$1,000. J. P. Wilson certifies that from one acre planted in watermelons last year netted him

\$403. One acre planted in radishes R. L. Glass states that he sold 80 barrels at \$15.00 per barrel and that net receipts for two months gave him \$640. W. M. Smith sold from one acre watermelons \$1,112.25 during the months of March and April.

Then there are town gardeners who have made wonderful records this spring and among this number is R. J. Buser, who lives at the corner of 15th street and 22nd avenue, Gulfport. What a garden in the rear of his home which is x 50 feet in size less the site occupied by small barn. In this garden are 240 hills of prolific corn and on each stalk is an average of four ears. Besides corn he has beans and okra and his crop of these vegetables amounts on some days to \$150.

These records show how wonderfully productive these lands are when intelligence is used in cultivation.

ST. STANISLAUS BASEBALL.

Last Saturday our team went to Spring Hill and played there Saturday afternoon and Sunday morning.

The Spring Hill people will remember those two games for a long time. Saturday's game resulted in a victory for Mobile by a score of 8 to 6. "Hippo" Phillips pitched and worked hard but the breaks were against us and though we scored more runs than any team except L. S. U. we lost. Sunday's game was a different story. Strong was in the box and there were eight men playing and playing hard behind him. A few hits in the first inning and we were four runs to the lead. The phenomenal fielding cut down runs all through the game and when the ninth inning came we led five to three. A rally threatened to cost another game but the brilliant fielding in the outer gardens put Spring Hill on the losing side of the account. This is the first time in the history of our athletic relationship that Stanislaus has defeated Spring Hill in baseball.

Boys' High Games.
Thursday and Friday of this week were two good baseball days here, though the local patrons seemed not to know it. The two games netted \$24.25 in gate receipts. Thursday's game was a slugging bee for Boys' High and a wonderfully good day for their pitcher, Tiggett. Another record was broken when they beat us. This is the first time in ten years that Boys' High has gone over with a win in any event from us.

Phillips' arm was not working again Thursday and he was asked to get the full nine innings he was to be allowed to go back at them Friday. After the visitors had garnered five runs off Torgeson from hits and errors, Hippo went into the game in the third inning and the game was over as far as scoring was concerned. In the sixth with the score 5 to 2 against us, we started in a batting bee that drove two pitchers from the mound. When the ninth came with a four-run lead we were going good and even the Boys' H. bat boys was warming up as four pitchers had failed to stop us.

Tomorrow's Game.
Another bank team. The Interstate Bank team will be over tomorrow to try to do what all the other banks have failed to do—win a game from the college. Come and show some rooting for us, we need it. A game with Post Christian here next Thursday and then on Sunday, the 12th, we close the season with a return game for the Hibernians.

Burns Orator of Flag Day Meet.
A. J. Burns, of New Orleans has been secured as orator of the day for the annual celebration of Flag Day under the auspices of Biloxi Lodge of Elks. The committee has arranged an excellent program of vocal and instrumental music and the entertainment will be held at the local home June 14th. Mr. Burns whose business address is New Orleans is a resident of Bay St. Louis.

INTELLIGENT CULTIVATION OF COAST LANDS IS ATTENDING MUCH SUCCESS.

(Gulf Coast Herald.)

To homeseekers who have lived in those sections where the world's great staples are grown these lands look very unattractive, but intelligent cultivation of them shows how erroneous such ideas are. A local real estate firm has incorporated in a circular just published just what has been accomplished in this section by farmers who are energetic and who have good judgment. E. A local real estate firm has incorporated in a circular just published just what has been accomplished in this section by farmers who are energetic and who have good judgment. E. Hagan, who cultivates 100 acres near Wolf river makes a statement certified to before Judge A. Ballance that he made 7,000 gallons of syrup off 20 acres of land, and that his other products consisting of cotton, corn, beans and potatoes, (Irish and sweet) had a market value of \$15,000. S. A. Chandler states that from 7 acres planted in vegetables during the past winter and spring were \$1,000. J. P. Wilson certifies that from one acre planted in watermelons last year netted him

THE TRIALS OF A HOUSEWIFE

How They Have Been Endured and How Overcome by Lydia E. Pinkham's Vegetable Compound

Experience of a Providence Woman

Providence, R. I.—"I took Lydia E. Pinkham's Vegetable Compound for a female trouble and headache. It began just after my baby was born, and I did the best I could about getting my work done, but I had awful bearing-down pains so I could not stand on my feet. I read in the papers about Lydia E. Pinkham's Vegetable Compound and the good it was doing other women, and I have got dandy results from it and will always recommend it. You can use these facts as a testimonial if you wish."—Mrs. HARRIET L. CASSEN, 18 Meni Court, Providence, R. I.

Ohio woman for three years could hardly keep about and do her housework she was ill. Made well by Lydia E. Pinkham's Vegetable Compound.
Elyria, O.—"For about three years I was very nervous and had headache, dizziness, dragging-down pains, could not sleep at night, and had no appetite. At times I could hardly do my housework. I got medicine from the doctor but it did not help me. I saw Lydia E. Pinkham's Vegetable Compound advertised in a newspaper and took it with good results and am now able to do my housework. I recommend your medicine to my friends and you may publish my testimonial."—Mrs. CHESTER A. BALL, R. 15, Fayette, Ohio.

An Illinois woman relates her experience:
Bloomington, Ill.—"I was never very strong and female trouble kept me so weak I had no interest in my housework. I had such a headache I could not cook a meal or sweep a room without raging with pain. Rubbing my back with alcohol sometimes eased the pain for a few hours, but did not stop it. I heard of Lydia E. Pinkham's Vegetable Compound, and six bottles of it have made me as strong and healthy as any woman; and I give my thanks to it for my health."—Mrs. J. A. McQUITTY, 610 W. Walnut St., Bloomington, Ill.

The conditions described by Mrs. Cassen, Mrs. Ball, and Mrs. McQuitty will appeal to many women who struggle on with their daily tasks in just such conditions—in fact, it is said that the tragedy in the lives of some women is almost beyond belief. Day in and day out they slave in their homes for their families—beside the daily routine of housework, often make clothes for themselves and for their children, or work in their gardens, all the while suffering from those awful bearing-down pains, headache, dizziness, nervousness, the blues, and troubles which sap the very foundation of life until there comes a time when nature gives out and an operation seems inevitable. If such women would only profit by the experience of these three women, and remember that Lydia E. Pinkham's Vegetable Compound is the natural restorative for such conditions it may save them years of suffering and unhappiness.

There is hardly a neighborhood in any town or hamlet in the United States wherein some woman does not reside who has been restored to health by this famous medicine. Therefore ask your neighbor, and you will find in a great many cases that at some time or other she, too, has been benefited by taking it, and will recommend it to you. For more than forty years this old-fashioned root and herb medicine has been restoring suffering women to health and strength.

Lydia E. Pinkham's Private Text-Book upon "Ailments Peculiar to Women" will be sent to you free upon request. Write to The Lydia E. Pinkham Medicine Co., Lynn, Massachusetts. This book contains valuable information.

SPHON'S DISTEMPER COMPOUND
DON'T LET THAT COUGH CONTINUE!
Will knock it in very short time. At the first sign of a cough or cold in your horse, give a few doses of "SPHON'S." It will act on the glands, eliminate the disease germ and prevent further destruction of body by disease. "SPHON'S" has been the standard remedy for DISTEMPER, INFLUENZA, PINK EYE, BRONCHITIS, CROUP, COLIC and COUGHS for over a century. 50 cents and \$1.50 per bottle at all drug stores. SPHON MEDICAL COMPANY, GOSHEN, IND.

POULTRY

DIFFERENT BREEDS OF HENS

Leghorns and Minorcas Are Best for Eggs, But Are Poor Sitters—Brahmas Best for Meat

(Prepared by the United States Department of Agriculture.)
Chickens, for convenience, may be classified as egg breeds, meat breeds, general-purpose breeds, and fancy or ornamental breeds.

The egg breeds include the small or medium-sized fowls which are very active, quick to mature, producers of white-shelled eggs, usually nonsitters or at best but poor sitters, and rather poor mothers, say poultry specialists of the United States Department of Agriculture. The varieties of Leghorns and Minorcas are good representatives of this class. Because they are poor sitters some other breed, or at least a few other fowls, should be kept if natural methods of incubation are to be employed. On account of their early maturity it is not uncommon for individuals of the egg breeds to begin laying at the age of four and one-half months. These breeds do not fatten as readily under ordinary conditions as the larger and less active breeds, and are rather sensitive to low temperature because of their large combs and wattles.

The larger fowls, represented in the meat class, are especially suitable for the production of large roasters. They are slow and somewhat sluggish in movement, have little desire for foraging, are easily confined by low fences, rather slow to mature, persistent sitters, and rather indifferent layers of brown-shelled eggs. Many poultrymen, however, are getting very fair egg yields from them. The Brahmas, Langshans and Cochins may be mentioned as belonging to this class.

The general-purpose breeds include fowls which are of fair size and which will also produce a good quantity of brown-shelled eggs, making them especially adapted to the person wishing a supply of both eggs and meat. As one has to make frequent sales of flesh in the shape of surplus cockerels and hens, the carcasses as well as egg production should be considered. The general-purpose breeds are usually good sitters and good mothers. They have medium-sized combs and wattles and endure cold weather well. They

Inspecting Butter

conditions, hence sweet cream butter is especially suitable for shipping to distant countries, and for long voyages. Sweet cream butter is gradually coming into wider favor in the domestic market, the Department of Agriculture says, because some consumers prefer it. It has not so pronounced a flavor as ordinary butter, but it has a mild creamy flavor.

WASHING AND RINSING CANS
Much of Deterioration of Milk Supply Is Due to Contamination in Big Receptacles.
Much milk that is good when it leaves the stable is poor milk when it reaches the city dairy plant. The deterioration is due to contamination in the cans. In almost all cases the city dairy plants wash and sterilize the cans that they return to the farmers. The farmers, assuming that the cans are clean, fill them and return without further attention. As a matter of fact the washing is usually well done in a city milk plant. After the sterilizing with live steam, however, the cans are kept almost immediately, and almost always there is some moisture left in the can. The bacteria multiply immensely and by the time the cans are used again there are enough bacteria in them to seed the milk to the extent of many thousands of bacteria per cubic centimeter.

PROPER CARE OF YOUNG CALF
May Be Permitted to Graze With Other Cattle on Pasture, but Feed Grain Separately.
The calf may graze with other cattle on pasture, but should be fed grain separately. A bull calf should be separated from the heifers when about three or four months old. He should be kept with other bull calves or older cattle for company except at feeding time. The calf should then have a separate stall or pen.

DEHORNING IS RECOMMENDED
Operation Results in Quieter Cows and More Milk—Best Plan Is to Prevent Them.
Dehorning results in quieter cows and more milk, but horns are better prevented than removed. It is more humane to apply a little caustic to the calf than to dehorn a mature animal.

PROPER MATING OF TURKEYS
Fifteen Hens to One Vigorous Tom Is About Right—Males Will Fight Fiercely.
Fifteen turkey hens can safely be mated to a vigorous tom. If 25 or 30 hens are kept, two toms should not be allowed to run with them at the same time, but one should be confined each day and the other the next. When two toms are allowed to run together during the mating season they fight fiercely and the stronger does practically all the mating.

Where Fowls Live
The farmer who keeps fowls should pay to the one who keeps them. Does not mean that the fowls should not be kept in the building, but that they should be kept in the building.

DAIRY FACTS

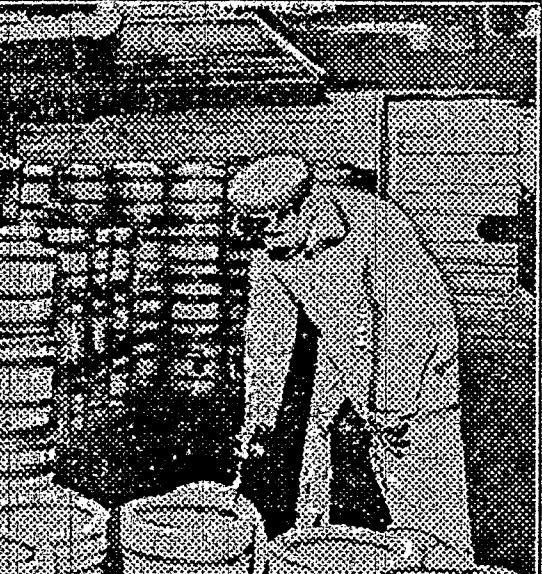

BUTTER FROM SWEET CREAM

Because of Its Better Keeping Qualities Larger Use of It Is Urged by Dairy Division

(Prepared by the United States Department of Agriculture.)
The dairy division, United States Department of Agriculture, advises a larger use of sweet cream butter, because of its better keeping quality.

The United States now is a large consumer of this kind of butter, according to the navy specifications from unimpaired or sweet cream, instead of from the cream ripened to sourness, of which most creamery butter is made. For several years past it has been the practice of the Navy department to contract for butter made of sweet cream in large amounts to supply the officers and sailors. This butter is packed under the supervision of the dairy division of the United States Department of Agriculture. During the war, the personnel of the navy being painted, a much greater quantity of butter was needed.

The principal reason the navy desires sweet cream butter is that it keeps better. As the larger part of the butter supply is made during the summer months, it is necessary to put some of it in cold storage in order to have enough for winter, and in the course of time it develops various more or less undesirable flavors, due to long storage. Butter made from sweet cream does not develop such flavors for a much longer time, if at all. Many months after it has been made it is equal to fresh butter, provided it has been kept under proper conditions.

A Good Bunch of Steers

steers (30 pounds) and cottonseed meal (one and a half pounds), gain 67 pounds; steers (25 pounds) and mixed hay (eight pounds), gain 63 pounds; mixed hay (20 pounds) and ear corn (two pounds), gain 25 pounds; steers (30 pounds), gain 22 pounds.

The steers used in the wintering experiments at Lewisburg were grazed on pasture to determine the effect which the different rations fed and methods of wintering had on subsequent pasture gains.

PUREBRED FEMALES FAVORED
In Opinion of Specialists Number of Purebreds of Both Sexes Is Rapidly Increasing.
According to figures announced by the United States Department of Agriculture, live stock owners in the United States show a tendency toward purebred female animals as well as toward purebred sires. In fact, the use of well-bred sires appears to increase the use of good females. During the period October 1, 1919, to March 31, 1920, the quality of female stock kept in herds and flocks headed by purebred sires, was 48.3 per cent purebred, and 25 per cent scrub. The remaining number were grades of crossbreds. Later figures covering the period October 1, 1919, to December 31, 1920, show that the number of purebred females kept under cover, according to conditions had increased to 55.9 per cent and scrubs had fallen to 2.1.

These figures are based on a knowledge of the breeding of nearly 400,000 head of animals and poultry. In the opinion of department live stock specialists, the more general use of purebreds of both sexes on farms in the United States is increasing. In about a year it appears, the increase in the use of purebred females by purebred sire-keepers has been at least 7 per cent.

DEVELOP HORSES AND COLTS
Protein Feeds Tend to Produce Muscle—Concentrates Are Necessary for Work Animals.
For young horses and colts muscle development is very important. Protein feeds tend to produce this. So do leguminous hays, such as alfalfa, clover, cowpeas, soy beans and peanuts. The following concentrates are valuable: Wheat, bran, cottonseed meal, rice, bran and shorts. From one to two pounds of cottonseed meal a day with the grain have been found to be very economical and highly desirable for horses doing heavy work.

SELLS HIS POOR PUREBREDS
Undersized and Poorly Conformed Animals Sold for Beef by Nebraska Live Stock Man.
"I sold as best two purebred Short-horn bulls, one undersized, the other of poor conformation." This statement to the United States Department of Agriculture from a Nebraska stockman adding in the Better Stock campaign, indicates a growing understanding that desirable sires must be of good quality in addition to being purebred.

DEVELOP AND FATTEN SWINE
Terms Are Often Misused in Speaking of Hogs—Some Essentials for Development.
The word develop is often misused for the word fatten. This is a mistake. In order to develop a pig he must have suitable food to keep up a good growth of bone and muscle and regular exercise to give him strength and vigor.

Make Future of Steer
The future of a steer is made during the first year of his life, once growth and thrifty, it takes less food to maintain that condition.

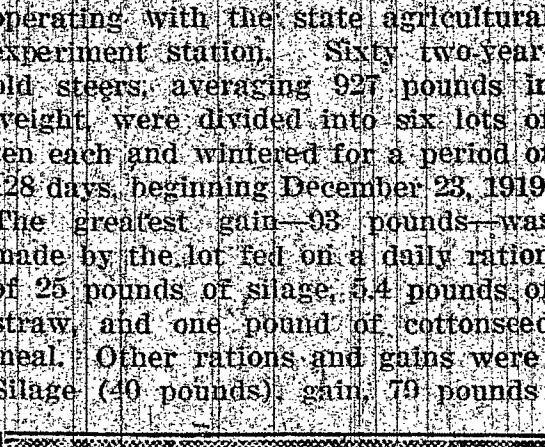

Avoid Thrumps in Pige
Exercise and care in feeding will prevent thrumps, says the Middle West Poultry Association. A necessary precaution is to keep the birds clean.

FARM LIVE STOCK

FEED FOR WINTERING STEERS

Methods Used and Results Obtained by Department of Agriculture at Lewisburg, W. Va.

(Prepared by the United States Department of Agriculture.)
Experiments to determine the most desirable rations and methods for wintering steers were continued last year at Lewisburg, W. Va., by the United States Department of Agriculture, co-operating with the state agricultural experiment station. Sixty two-year-old steers, averaging 927 pounds in weight, were divided into six lots of ten each and wintered for a period of 128 days, beginning December 23, 1919. The greatest gain—93 pounds—was made by the lot fed on a daily ration of 25 pounds of silage, 4 pounds of straw, and one pound of cottonseed meal. Other rations and gains were: Silage (40 pounds), gain 70 pounds;

A Good Bunch of Steers

silage (30 pounds) and cottonseed meal (one and a half pounds), gain 67 pounds; steers (25 pounds) and mixed hay (eight pounds), gain 63 pounds; mixed hay (20 pounds) and ear corn (two pounds), gain 25 pounds; steers (30 pounds), gain 22 pounds.

The steers used in the wintering experiments at Lewisburg were grazed on pasture to determine the effect which the different rations fed and methods of wintering had on subsequent pasture gains.

HOUSECLEANING METHODS

Frequent cleaning saves time and furnishings, as it is better for fabrics and woodwork. To be lightly cleaned, often.

Dust in fabrics tends to wear them out and when dust is allowed to remain it is often ground in or covered with a film of grease; in either case it is hard to remove.

Ordinary walls covered with paper, or plastered, are best cleaned with a light, sweeping stroke. Should be used for much grouting will rub the dust in or streak the walls. Renew the broom cloth or rag when it becomes soiled, turning it or using a fresh one. Cotton batting is good to clean places over radiators that soil more quickly. The pastes and powders said to be good to clean walls are best used by an expert, and they often leave a wall with streaks.

Washable papers should be wiped with a damp cloth—too much moisture will loosen the paper. These washable papers, if treated to a coat of varnish, may be treated more like a varnished wall.

Rough wall surfaces, like hurlup, should be cleaned with a vacuum cleaner or by brushing.

Painted walls may be washed with soap and water, rinsed with clean water and rubbed dry. Enamelled paint is dulled by using soap. A woolen cloth or cotton flannel cloth used with hot water and the wall then rubbed with a dry cloth is the safest treatment.

Caliche walls cannot be touched, as they streak with even a broom bag. The only treatment is to have them resurfaced.

Things may be cleaned with soap-suds, drying and polishing with a dry cloth.

Varnished and shellacked surfaces should be thoroughly dusted before using a soft cloth or a bit of furniture polish, which should be well rubbed in. Waxed surfaces are washed with warm water to remove the film of dust, or use a cloth moistened with turpentine or gasoline, being careful of fire. If the waxed surface has been dulled by water, use a weighted brush to polish.

Like the horn of the hunter sounding far and faint from the hill, setting the red blood pounding, making the pulses thrill with her fairy play, their mad and merry glee, the white spring goes to the Maying, and she calls to the heart.

THE SEASONABLE GREENS.
Even if one lives in a city, there is no reason why you should be denied a dish of fresh greens, for somewhere within riding distance there will be found the common dandelion, sorrel or cowslip, each of which is good for greens.

Sorrel Salad.—Gather the sorrel, if possible, early in the morning, with the dew still on it. Wash well, chop two cupsful and mix with one-half cupful each of seeded raisins and chopped walnuts; add French dressing and serve garnished with sliced radishes.

Dandelion Salad.—Gather the dandelions which have been bleached under wood or leaves; wash and chop; sprinkle with a little chopped onion, salt and pepper; add a dash of vinegar. The dandelions may be served with a mayonnaise or a boiled dressing and garnished with sliced radishes.

Boiled Dandelions and Sorrel.—Wash a peck or less of dandelions in water enough to thoroughly cleanse. If picked and put into a deep pan the dirt settles, after they have been soaked and stirred in an hour or two. Cook until nearly done in boiling water, then add the sorrel and cook until that is tender. Drain, chop, then reheat and season with salt, pepper, butter or bacon fat and garnish with hard-cooked eggs.

Dandelions cooked with a ham bone or with bacon make a most appetizing dish. The dandelion is rich in iron and a splendid blood purifier.

Water Cress.—This is another valuable spring tonic, rich in the minerals needed in the blood. Eaten with a sprinkling of salt or in combination with lettuce it makes a most piquant salad.

White Sauce With Cheese.—Prepare toast, butter well and keep hot. Prepare a white sauce by melting two tablespoonsful of butter, add two of flour and when well mixed pour over a cupful of rich milk. Stir and cook until well cooked, adding salt, pepper or paprika, then stir in one-half cupful of grated cheese. Stir until melted, then pour over the toast and serve at once. This makes a nice luncheon or supper dish.

Birds Moving Day.
It is now a well-established fact, says the American Forestry Magazine, that when the female woodcock for any reason desires to remove her young from one place to another, she takes them out, one at a time, between her feet, and holding them securely, she flies off with them to a place of safety.

Talk.
Self is the constant topic of conversation, and usually it is in the

THREE YEAR OLD WASHED ASHORE

Mrs. Dingman Tells of Adventure of Childhood When Father's Ship Was Wrecked.

RELATES LATER EXPERIENCE

Declares That the Way Tanlac Restored Her Health Is More Remarkable Than Anything She Has Ever Had Happen to Her.

"I've had some remarkable experiences in my life, but none more wonderful than the way Tanlac overcame my troubles and made me gain twenty pounds," was the statement of Mrs. Christina K. Dingman, 1216 Allee St., Oakland, Calif. One of the experiences to which Mrs. Dingman refers is well known to her friends. When a child of three years, accompanying her father, a noted sea captain, on an ocean trip, the vessel was wrecked, but she was almost miraculously saved. The small box into which she was put being washed ashore. According to her statement, Mrs. Dingman enjoyed the best of health until three years ago when she began to suffer from a bad form of stomach trouble and later from rheumatism. How she was completely restored to health is best told in her own words:

"Nobody knows how I suffered for the past three years. No matter how carefully I ate I would endure agonies afterwards, from smothering and sniffling spells. Sometimes they were so severe I would fall to the floor and would have to be carried to bed. I went for days at a time without eating, as I dreaded the misery I knew would follow; no matter what I ate. Then rheumatism set in and my shoulders and arms hurt me so I couldn't comb my hair. My back felt like it was breaking in two.

"I was almost in the depths of despair when I began on Tanlac, but this grand medicine has made me a well and happy woman. I'm not even troubled with constipation now. Thanks to the Excessive Tablets which are far superior to anything of the kind I ever tried. It seems almost too good to be true, but here I am in the best of health and spirits after I had given up hope, and I'll always praise Tanlac for it."

Tanlac is sold by leading druggists everywhere.—Advertisement.

Minnesota has more than 4,000 women trade unionists.

Catarth
Catarth is a local disease greatly influenced by conditions. HALL'S CATARTH MEDICINE is a Tonic and Blood Purifier. It cleanses the blood and builds up the system. HALL'S CATARTH MEDICINE restores normal conditions and allows Nature to do its work.

ALLEN'S FOOT-EASE
The Antiseptic Powder to Shake into Your Shoes.
And sprinkle in the Foot-Bath. It takes the sting out of Corns, Bunions, Blisters and Calluses, and gives rest and comfort to hot, tired, smarting, swollen feet. More than 1,500,000 pairs of shoes have been treated by Allen's Foot-Ease during the war. Allen's Foot-Ease, the powder that takes the friction from the shoe, freshens the feet and gives new vigor. Nothing relieves the pain of tight or new shoes so quickly. Sold everywhere. Ask for ALLEN'S FOOT-EASE.

BABIES LOVE MRS. WINSLOW'S SYRUP
The Infants' and Children's Remedy. Pleasant to give—pleasant to take. Guaranteed purely vegetable and absolutely harmless. It quickly cures colic, diarrhea, flatulence and other like disorders. The only reliable formula "appears on the wrapper."

THE SEA COAST ECHO

CHAS. G. MOREAU, EDITOR AND PUBLISHER.

Official Journal of the Board of Supervisors, Hancock County, Miss.
Official Journal of Board of Mayor and Aldermen, Bay St. Louis, Miss.

CITY ECHOES.

Attorney Carl Marshall was a professional visitor to Hattiesburg, Miss., during the week.

Judging from reports reaching this office fishing hereabouts must be pretty good just now.

Cashier Leo W. Seal of the Hancock County Bank was a business visitor to Pass Christian and Gulfport Thursday afternoon. The bank is also noted.

Miss Decima Rea, of Wesson, Miss., has been visiting her brother and sister-in-law, Mr. and Mrs. Geo. R. Rea at their home in Washington street.

Mrs. A. Beuchel, son and daughter have returned from an automobile trip to Bogalusa, La., where they spent nearly two weeks visiting relatives and in which they had an interesting and most enjoyable stay.

Mr. Harold McCord came out from New Orleans during the early part of the week and spent several days with Bay shore and friends, guests at the home of Dr. C. L. Horton in Carroll avenue.

Miss Elsie Day has returned to her home from Toure. Infirmary, where she was recently successfully operated for appendicitis. She is on the high road to recovery which will be good news to the many friends of the family.

Miss Vivian Ducatel went down to New Orleans Wednesday to attend the wedding of her friend, Miss Adele Manning, who has frequently visited and is well-known in younger circles of Bay St. Louis.

Rathbone DeBuys, well-known New Orleans architect, was a visitor to Bay St. Louis during the week in the interest of the proposed tourist hotel. He is best known by the success of his past work.

Mrs. Edwin W. Edwards, and children are here from Gulfport, spending the week with their relatives, Mrs. Kate Edwards and family in Washington Street, and their many friends are glad to have them again in their midst.

Messrs. R. C. Engman and F. C. Bortages, Sr., have formed a co-partnership for the real estate business and have taken out license accordingly. They will make a specialty of buying and selling and will operate in both city and county.

Mr. E. J. Gex has leased the Vona cottage in Main street, adjoining the county court house property, and after extensive repairs and renovation will have been made thereto, will occupy it with his family.

Mr. C. L. Waller, recent purchaser of the beautiful Gex building lot on Front near corner Goodchild street, is building in the interior of the premises for his own occupancy awaiting the construction of the main bungalow which he is to have built this fall.

Miss Jean Horton was host to the Young Ladies' Social Club at the Tea Room last Saturday. Miss Alene Ransen is president; Miss Mary Perkins, vice-president and Miss Rita Breth, secretary-treasurer. The club is planning many affairs for the summer season, including frequent dances.

Chancery Court for Hancock county adjourned Wednesday, after a most busy session, with Judge Griffith on the bench. The hearing of divorce cases appears to have occupied most of the court's time, the judge not allowing his court to dwell too lightly on such business, but on the contrary, is getting to be quite a difficult matter to secure a divorce in the local courts.

Mrs. M. V. Gex recently purchased from T. L. Trawick the lot of land on Second street, near Carroll avenue, and adjoining the rear her beach property, and is having built a very attractive dwelling on the bungalow style, which, when completed, will be very handsome. Needless to say, the property is already leased to desirable tenants.

While fishing off the bay front during the week, J. N. Barrios, who is visiting C. L. Block, had quite an exciting time with a six foot gar. He was fishing with an ordinary fishing line when the gar was caught. Finding it in shore as close as he could a messenger was sent to the house for a rifle but before he returned the fish was gone. It was quite thrilling for Mr. Barrios, for the gar put up a good fight and the experience was added largely to his week's visit to Bay St. Louis.

Miss Gertrude Guerra, of Atlanta, Ga., is spending awhile here visiting her sister, Mrs. Cassius Peacock, in Washington street, enroute to Sierra Madre, California, where she will join her mother, Mrs. E. M. Mattox and brother, Mr. Loyd Guerra, who have been on the Pacific coast several months and where they are contemplating locating permanently.

A. Dean, well-known and successful merchant at Pearlington, was in Bay St. Louis Thursday, mingling with his many friends and attending to business matters. We are glad to note that Mr. Dean has sufficiently recovered from the effects of his recent accident in which he broke his right arm, so to be able feel that he will soon be able to use the injured member. Mr. Dean reports business pretty good in his section of the county, and it is interesting to learn that he is getting to be quite a property to which he is entitled to by reason of his application to business and well-known enterprise.

The Echo learns with interest of the success of J. J. McGraw, of Toure, Miss., father of E. G. Rube, of Bay St. Louis, in his recent race for the Legislature from Yazoo County. Mr. McGraw was elected to fill the unexpired term of Hon. Pat McGeehan, deceased, and defeated some opposition in the race. The success of Mr. McGraw is a source of pride to his family and friends.

Mr. E. G. Gardebled, member of one of the best and well known families in Bay St. Louis, and who has to give up business some years since because of failing eyesight, is at the Toure, New Orleans, undergoing a special treatment and the very best known to science. It is hoped this well-known citizen will be successful in his quest at the hands of skill and science.

While this paper does not deal in hearsay and rumors, reports that seem well authenticated and which are persistent are to the effect the big mill at Kiln of the Edwards Hines Yellow Pine Trusts will be in full operation, again, by September 1, if not earlier, and from work that is carried on about the premises it is but reasonable to place some credence in the reports. The mill has been shut down since the 1st day of last December and the absence of the mill activities has not only been keenly felt in the immediate neighborhood, but as far as Bay St. Louis.

WANTED—Small collapsible sulky or baby buggy. Apply at Echo office immediately.

As the college baseball season is fast drawing to a close no one should miss the game tomorrow afternoon on the campus at 2:30 o'clock when the collegians will cross bats with the Interstate members of the New Orleans Bankers' League. The opponents tomorrow are formidable and a good game will no doubt result. There ought to be a record-breaking crowd present.

It will be interesting to learn that the local hotel committee has been in session every night the past week, and expect to have something tangible to report by the early part of next week. The sentiment is to build the hotel and the plan is to do it right. The committee has given the project much time and attention. The right kind of hotel; right kind of way; procure the management under the right kind of conditions and terms is a matter of weighty consideration.

Mr. and Mrs. N. J. Barrios, Mrs. Barrios and their son are here from New Orleans for a week's visit, the house guests of Mr. and Mrs. C. L. Block and family at St. Charles and Front streets. This is Mr. Barrios' first visit to Bay St. Louis and needless to say he and his family are thoroughly charmed with their visit and intend buying a home here in the future. Mr. Barrios is a prominent business man of the Crescent City.

It is a significant fact that there is not a box available for rent at the local postoffice, and the demand for renters on file calls for the necessity of another section of boxes put in place at an early date. The demand for local telephones is also at high water mark. Before the demand can be supplied the local manager of the Cumberland exchange says it will be necessary for an additional section to the already large switchboard. That Bay St. Louis continues to grow cannot be denied.

Remains of Seymour Carrio, Jr., son of Seymour Carrio and Margaret Kilbride, who died at Goudrecount, France, January 26, 1918, reached Bay St. Louis Wednesday morning from New York where five thousand other soldier bodies landed direct from France, a few days previously. The deceased was 21 years of age at the time of his death. He was a native of Waveland, and was among the first to leave from Bay St. Louis to serve his country. The funeral took place from the residence of his parents in Washington street Thursday afternoon, which was largely attended as a mark of esteem to his internment at Goudrecount cemetery and a tribute to his valor.

The people of Logtown as a community are to be congratulated on the fact that this year, in the history of their town, the Logtown school turned out its first class of graduates, and an excellent one at that. Fred Arendale, who has had charge of the school for the past several terms as brought up the school to the standard of a high school and the standard of every grade has been raised to the extent that it will compare with any school of its kind in the State. The people of Logtown must, and we feel sure they do feel very proud of the good work which is being accomplished. The names of the graduates and the personnel of the school corps will be found in another column.

Mr. A. F. Piper, who has moved his family from New Orleans to make Bay St. Louis his and their home, has given his premises on the corner of Second and State streets, the touch of the whitewash brush and other sanitary and artistic attention that is worthy of emulation, although the property is not his own. Thinking people cannot lose sight of this spirit, and a little more of this would go a far way in beautifying the town and make individual property no matter how humble, more attractive and add to its value. Just as it has been said the clothes proclaim the man it might be said a man is known by the home in which he lives and by the appearance of his premises.

The beautiful building lots, Ulman avenue and Second streets here, belonging to Blanks Turner, and the lands on the opposite corner owned by the late Montague estate were sold this week through the E. E. Lucas real estate agency to Mr. A. Batistella, formerly of New Orleans but now of Bay St. Louis. It is Mr. Batistella's intention to build a number of choice bungalow dwellings, and these lands are an investment, and judging from the character of improvements he has placed on his former purchase in Carroll avenue we can expect more than ordinary improvements. The purchases of these few lots will be a source of pride to the community.

Hamstitching and Picot Work. The ladies of Bay St. Louis and vicinity will learn with interest that I have received and have in active operation a new hamstitching machine, and am prepared to do all kinds of

Mr. and Mrs. John Osozmach were visitors to New Orleans Wednesday combining business with pleasure.

Mr. George H. Morris, recent purchaser of Nellie's Villa, arrived with his family during the week for the summer season, and have taken active possession of their new home on the beach front. Mr. Morris is well-known in New Orleans financial circles as head of the Crescent City Building and Loan Association.

Miss Gladys O'Neal has returned here from New Orleans where she has been at Toure for a while, undergoing treatment for adhesion, following a late surgical operation. Miss Gladys is one of the charming and accomplished young ladies of the community and her home friends will learn with interest of her return.

Mrs. Remy Klock, proprietress of the Klock Hotel, has returned from a three-month visit to her son-in-law and daughter, Mr. and Mrs. P. A. Fitzhugh, at Morganza, La., and Mrs. Klock's return to Bay St. Louis is warmly welcomed by the many local friends. Mrs. Klock is at home with Mr. and Mrs. Joseph Schwartz and family.

Invitations have been received in this city by friends of Mr. and Mrs. John Keach, former Bay St. Louis residents, but now of New Orleans, to the annual commencement exercises of Newcomb College, Class 21, of which Miss Adele Keach is a member. Miss Keach is a graduate of St. Joseph Academy, this city, and entered Newcomb from the local institution. She will again graduate with honors, and the many local friends will learn of her success with more than a little interest.

Dr. Ben Plunkett, who has been visiting at the home of his relatives, Mr. and Mrs. E. J. Gex and family, while stopping over in Houston, Texas, enroute to his home in Oklahoma, was the victim of a hotel fire, and injured about the head to such extent that at first it was thought his injuries would prove fatal. Local relatives were apprised of the accident and a brother, Dr. Plunkett, of Carrere, hastened to the bedside. However, later reports are to the effect that the patient was getting better, which we are glad to state.

The many Coast friends of Mr. R. N. Blaize, formerly of Pass Christian and of Bay St. Louis, will learn with interest of his success in his new home at Houston, Texas, where with his family he has located since last fall. Mr. Blaize holds a responsible position with the Gulf Refining Company, and his services has been recognized by a substantial promotion. A few days since he purchased lots in the choice residential sections of that city and is preparing to build a family home. He is deserving of all the success that may come his way.

It would seem hardly necessary to call attention to the fact that the Echo practically circulates in the home of every family in Bay St. Louis, and hardly a person there is who does not read these columns, hence its value as an advertising medium is not to be questioned. Yet it is noticed there is much advertising carried through the medium of the well-circulated newspaper, simply because the medium might be cheaper or cost nothing. It is generally the case this kind of "cheap" advertising is not only ineffective but many business stamps the advertiser as "cheap." It is on the part with the merchant who is always asking the local press to boost the city, to decry the mail order houses, etc., then either uses a rubber stamp for his letter heads and statements or sends to Mobile or New Orleans for his printing.

Miss M. Edwards, who has taught at the Biloxi Central School the past two years with signal success, has resigned and taken a similar position with McGehee's Select School and affiliated and well-known institution at New Orleans. Miss Edwards is a professional teacher of more than ordinary ability and success, and her leaving-taking of Biloxi at the school on the last day of the term of the week, was the occasion of an outpouring of many expressions of regret. The pupils presented Miss Edwards with a tribute of appreciation of her work and of personal esteem and there was an effort made to have her reconsider her resignation. Miss Edwards' twelve years work in the Bay St. Louis schools is well known and the local schools sustained a loss when she resigned.

BAY CLINIC AND HOSPITAL ASSOCIATION DISSOLVED.

At a meeting of the board of directors of the St. Joseph Clinic and Hospital Association held last night the resignation of Mrs. Marshall Ballard as president was accepted, and the adoption of a resolution mutually agreed to dissolve the association followed.

As far as can be done, the money remaining will be pro rated and returned to the donors and all articles and material contributed will also be given back.

Following the opinion that there was no need of public clinic since the local doctors did much if not all of this kind of free work at their respective offices, it was decided that a hospital just now would hardly be justified.

The matter of dissolving was definitely and finally agreed upon at last night's meeting, and the legal steps of procedure were entered into. The effort to establish a hospital and clinic was indeed a noble one and it is regretted matters so shaped themselves and conditions arose which make it well-nigh impossible for the present to continue the great cause. However, the huge of the great work by the good men and women who were actively identified is not dulled, for by their work they have shown themselves true humanitarians, loyal workers and ideal citizens to that degree far above the average.

Southern Farmers In Gulf-Coast Territory

Farmers all over the Gulf-Coast section—famous for its wonderful fertility of soil, ideal living conditions and year-round succession of abundant crops—while their Northern and Western brethren are breaking ground and getting ready to plant, are

Now Marketing First Crops With More To Follow

Radishes, Cabbage, New Potatoes, Green Beans, New Corn, Cucumbers, etc., are going in car loads, by fast freight, to the markets of the North and East, commanding high prices from the people of those less-favored climes. These are FIRST crops; and as they are exhausted re-planting follows without interruption and other crops, from the same ground, come on in quick and continuous succession. Thus, these favored farmers need never be idle nor have their capital tied up and unproductive.

The L. & N. Serves the Community In Serving The Farmer

The Department of Immigration and Industry, long-established and most efficiently maintained by the Louisville and Nashville Railroad Company, has always done remarkable work in seeking out farmers in other sections and inducing them to move to this Gulf Coast country, not only BRINGING them here, but looking after their interests when they get here. Helping them to start right and go right; showing them the kind of land to buy and the kind of crops to plant, best suited to their individual equipment and requirements; how to cultivate and to market their crops to the best advantage; to make money and become happy, contented and useful citizens.

This is one feature of the constructive, community-building service which the L. & N. renders the South, particularly, and the nation as a whole.

Vacation Times Are Just Ahead
